CAREER OBJECTIVE

Highly dedicated Full Stack Developer specializing in the **MERN Stack** and **Next.js** ecosystem. My expertise lies in designing scalable database architectures, applying responsive design principles, developing robust RESTful APIs, and building intuitive, pixel-perfect front-end interfaces. I leverage modern AI-assisted development tools to accelerate production and deliver high-performance, user-centric digital solutions.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Next.js, React Router, React Query, Redux Toolkit, and Context API.
- **Backend:** Node.js, Express.js, REST APIs, Next.js API, JWT(JSON Web Token), Firebase and Clerk Authentication
- **Database:** MongoDB, Mongoose (ODM)
- **Tools & Platforms:** Git, GitHub, Docker, Linux, VS Code, Cursor, Postman, Vercel, Netlify, Figma, AI-Assisted Development, Prompt Engineering.

EXPERIENCE

Web & Technical SEO Consultant - Liquidation Center (Remote)

Jun 2023 – Dec 2023

- Optimized Core Web Vitals and page speed for a faster user experience.
- Integrated Google Analytics and Search Console for performance tracking.
- Resolved indexing errors and optimized HTML architecture for better crawlability.

KEY PROJECTS

Care.IO – Full Stack Role Based Premium Caregiving Services Platform | [Live Link](#) | [GitHub](#)

As a Full Stack Developer, I leveraged AI-assisted coding and advanced prompt engineering to rapidly architect and build this secure platform, connecting users with certified caregivers.

Tech Stack: Next.js, TypeScript, Shadcn UI, Framer Motion, MongoDB, Mongoose, Recharts, Stripe, JWT.

Key Features:

- Engineered a Next.js and TypeScript architecture with secure JWT authentication, and troubleshooted & debugged application issues to deliver responsive RBAC dashboards.
- Designed scalable database schemas using Mongoose and MongoDB to handle multi-role data models and complex caregiver booking schedules.
- Integrated server-side Stripe payment gateway logic for secure transactions and built an interactive administrative analytics dashboard utilizing Recharts.

Book Courier – Full-Stack Role Based Online Book Management Platform | [Live](#) | [Client](#) | [Server](#)

As a developer, I built this complete full-stack platform to streamline book ordering and inventory management, ensuring a seamless experience across all user roles.

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB (Native Driver), Firebase, Stripe.

Key Features:

- Developed a responsive React.js UI and engineered a scalable Node.js/Express REST API for a multi-role platform.
- Formulated efficient MongoDB CRUD operations and managed seamless database connectivity for dynamic book ordering and real-time inventory tracking.
- Secured backend endpoints utilizing Firebase JWT validation and integrated Stripe for safe client checkouts.

StudyMate - Subject Wise Smart Study Partner Matching App | [Live](#) | [Client](#) | [Server](#)

As a developer, I architected this full-stack application to help students easily find and connect with ideal study partners based on specific matching criteria.

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB (Native Driver), Firebase Auth.

Key Features:

- Developed a responsive React.js and Tailwind CSS dashboard featuring native dark mode.
- Engineered an Express.js backend with MongoDB filtering queries for precise student matching.
- Secured API endpoints and user sessions utilizing robust Firebase Authentication.

EDUCATION

Bachelor of Arts in Arabic Language & Literature

International Islamic University Chittagong (01/2022 - 01/2026)

LANGUAGES

- Bangla (Native)
- English (Professional Proficiency)
